SAP Fiori elements boosts SAP Fiori development efficiency

Developer Productivity

- Focus on **business logic** and back-end services
- Write **less UI code**
- **Reduce** development and maintenance **costs**

UX Consistency

- Comply with the **latest SAP Fiori design** specification
- Deliver a **centrally managed** user experience
- Include **uniform** layout, navigation, search, filtering, and more

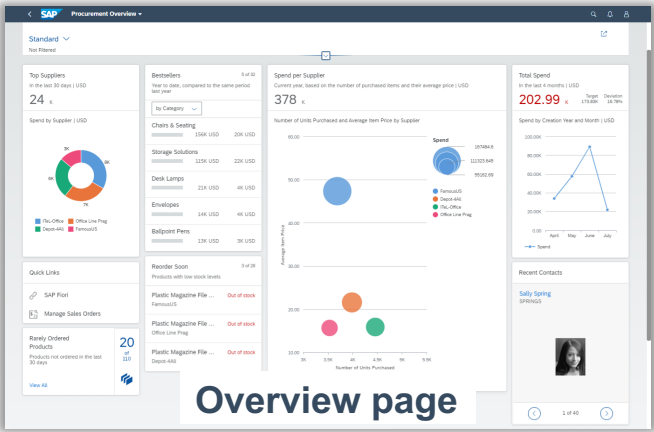

Enterprise Readiness

- Deliver **high quality** SAPUI5 applications to end-users
- Ensure **stable, optimize** UI code out of the box
- Include **standard enterprise features** (accessibility, mobile, translation support, ...)

Standard page types increase developer productivity

Most use cases in the enterprise space involve providing an **overview**, **lists** of business objects and management of these business **objects**.

Provide **overview** on business relevant data

Work on a **list** of business objects

OData connects your application to the back-end

OData: a standardized method (Open Data Protocol) based on HTTP for interacting with data on a server, ensuring interoperability between sources

SAP Fiori elements connects with OData services out-of-the-box

OData annotations fine-tune how the app looks and behaves

Consumption hints
Which fields allow a human to identify the entity?
Which fields are clickable?

Semantics
“These fields shall be displayed together in a form”

Behavior
“This entity can be edited”

Semantics
“This is the currency for the amount”

Semantics
“This is an email address”

The screenshot shows the SAP Fiori 'Visitor Chair - Green' (OF-CS-1002) product page. Annotations highlight specific UI elements and their underlying OData semantics:

- Consumption hints:** Arrows point to the chair image and the 'Price' field (122.00 USD).
- Semantics:** An arrow points to the 'Price' field, indicating the currency 'USD'.
- Behavior:** An arrow points to the 'Edit' button, indicating that the entity can be edited.
- Semantics:** An arrow points to the 'Modified by' field, which displays the email address 'hans-juergen.richstein@sap.com'.
- Semantics:** An arrow points to the 'Basic Data' section, indicating that fields like 'Product', 'Name', 'Description', 'Category', 'Supplier', 'Price', and 'Alternative Product' are grouped together for identification.

SAP Fiori elements generates the app from OData services & annotations

What is displayed?

OData service

- Expose data & relations

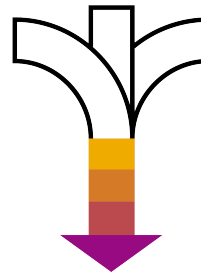

OData annotation

- Semantic metadata
- Behavior
- Consumption hints

How is it displayed?

SAP Fiori elements page types

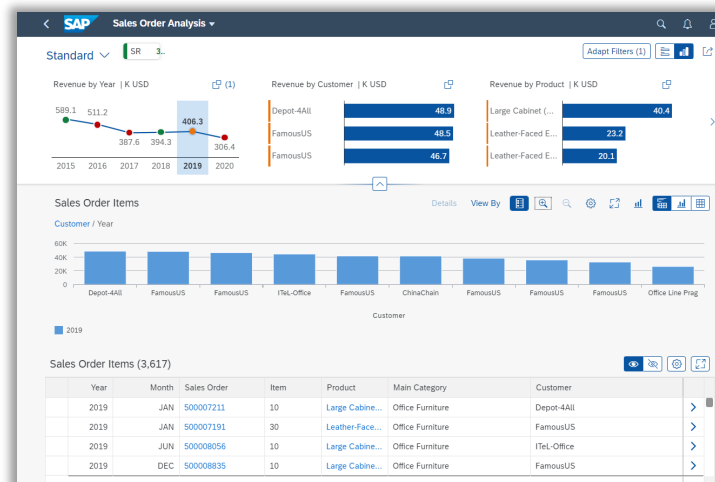

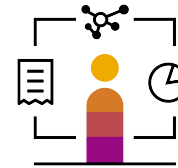

- Using SAPUI5 Controls
- Applying generic controller logic
- E.g. Analytical list page

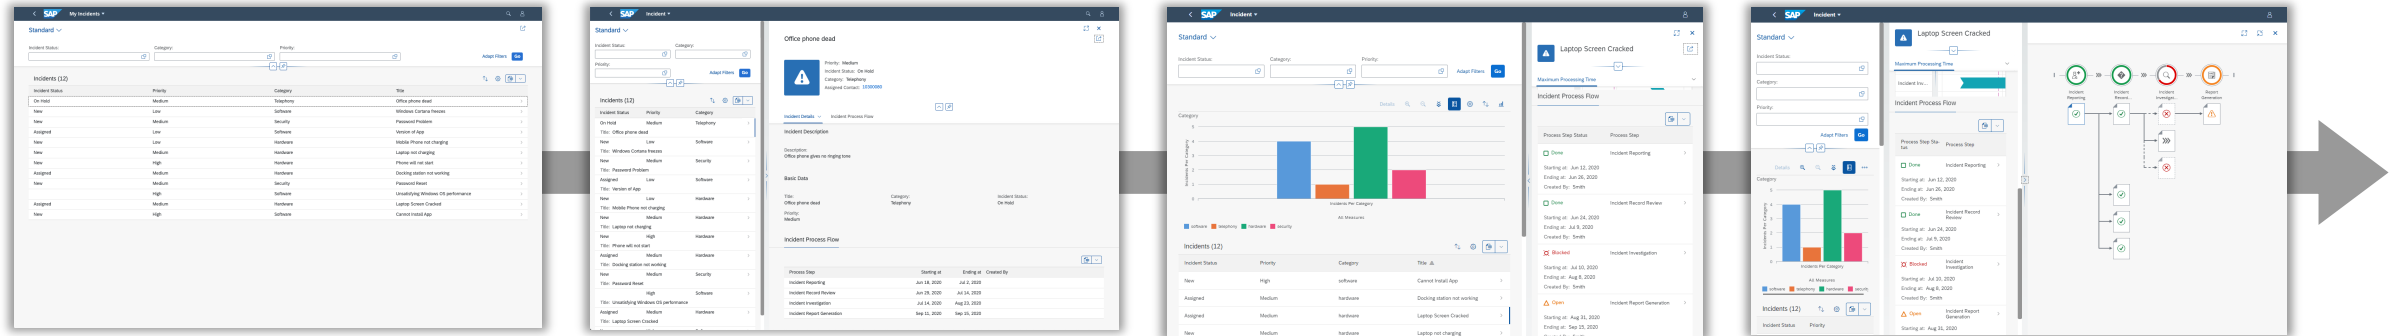

Provided by:
Application Developers

Provided by:
SAP Fiori elements framework

SAP Fiori elements application architecture provides flexibility

Start with the generated app based on a standard page type

Configure the app, e.g. apply the **flexible column layout**

Enhance the app with annotations, as needed

Extend the app with SAPUI5 code, if necessary

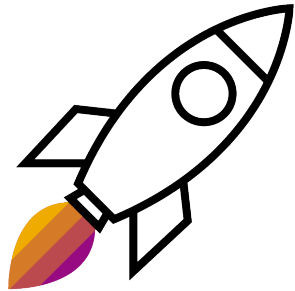

SAP builds over 80% of new apps for SAP S/4HANA using Fiori elements

SAP Fiori elements prioritizes efficiency over flexibility

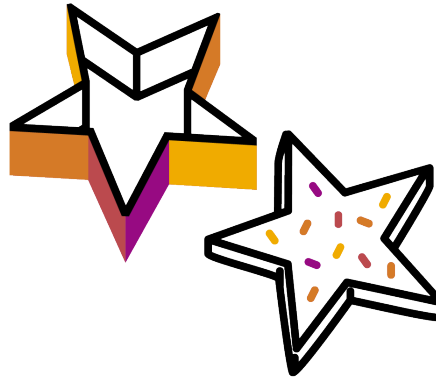

Freestyle SAPUI5		SAP Fiori elements
Flexibility	Overall approach	Efficiency
Freestyle designs	Design requirements	SAP templates
Web Development	Development knowledge	Annotations
Own coding, own UI logic	App ownership / maintenance	Own annotations, SAP's UI logic
Higher	Total cost of development and maintenance	Lower

3 things to remember about SAP Fiori elements & SAP Fiori tools

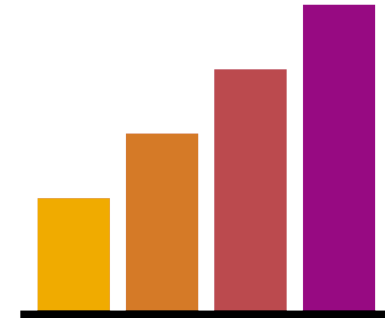

1. SAP Fiori elements & SAP Fiori tools **accelerate** app development

2. SAP Fiori elements enables **UX consistency**

3. SAP Fiori elements covers **80%** of app development scenarios
